

Discreet, versatile and strong this SoundXtra bracket has all the features you're looking for to wall mount a Sonos One, One SL or a Play:1.

Once fitted the speaker can be angled down 15° or swivelled left or right up to 80° ensuring you can position sound exactly where desired.

Constructed from high-grade steel and ABS it will securely hold the speaker even upside-down (so you still have access to the controls when it's higher up the wall).

- Angle your sound with tilt (15°) and swivel (40° left, 40° right)
- Can be inverted to securely hold the speaker upside down – so its controls (and the Sonos One microphone) are easily accessible if mounting higher up the wall
- Precision engineered. Quick and easy to fit and adjust
- Available in black or white to perfectly match for Sonos One, One SL and Play:1
- Designed and manufactured in the UK
